

Maner Costerisan Sure Step Implementation Methodology

Sure Step methodology has six phases: Diagnostic, Analysis, Design, Development, Deployment and Operation. Diagnostic is a pre-implementation phase that helps the customer with their due-diligence process for the selection of the right solutions to meet their needs. The Analysis, Design, Development, Deployment and Operation phases represent the five phases of implementation project, with the Operation phase encompassing post-implementation activities, in that it extends the project lifecycle beyond the implementation and into the Support stage.

Sure Step Helps Us Stay: On Time; On Budget; On Spec

Maner Costerisan can help you realize the benefits of your Microsoft Dynamics solution quickly and predictably with Sure Step, which helps us complete your implementation on-time, on-budget and on-spec.
